## Technical Assistance

Mark Zimmermann has 30 years experience in running a full time taxidermy studio. He would be glad to draw on his experience to answer any questions you may have. We are always updating ourselves to current modern techniques, so feel free to call us at: 403-291-0162

## NEW LOCATION

Hello Again,

Another year has passed and we are pleased to bring you our 14th catalogue.

We have worked very hard over the last year to greatly expand our line of manikins & supplies for you our Canadian taxidermists.

Enjoy looking through our new catalogue.

We would like to thank you for your past support and look forward to your calls.

Many thanks from the Zimmermann's.

## To the Taxidermist

Select Taxidermy Products has been very busy creating new products for the Canadian taxidermy industry.

We are introducing products that are no longer only available from the U.S to help you the Canadian taxidermist save money on exchange rates and shipping costs

We also have an online catalogue in which new products will be featured: [www.selecttaxidermy.com](http://www.selecttaxidermy.com)

## Attention Canadian Taxidermists

Hello everyone,

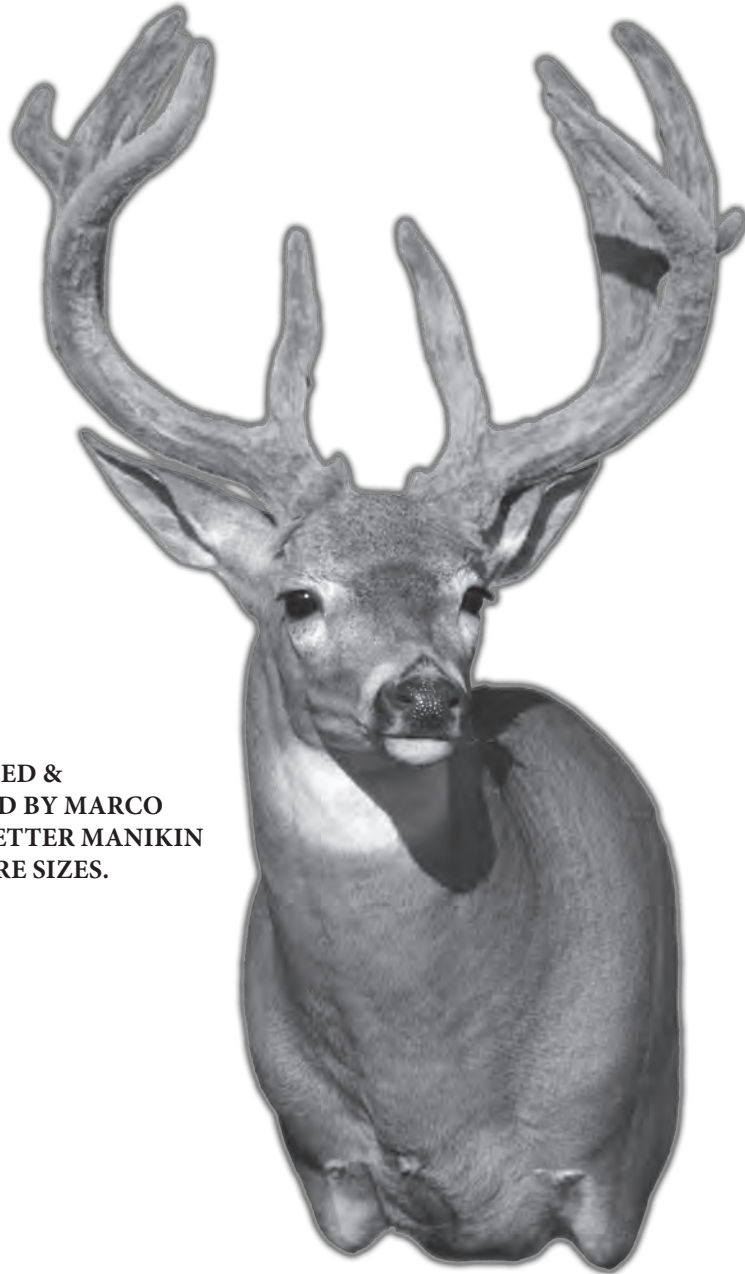

In the last two to three years, it has been very difficult for business as a result of COVID, supply chain issues & high freight costs. We will do our best to keep products in stock & available to you.

We are posting new items on instagram @selecttaxidermyproductsltd

Best regards in your business ventures.

# Sugar Creek Whitetails Semi Sneaks by Marco Pilon

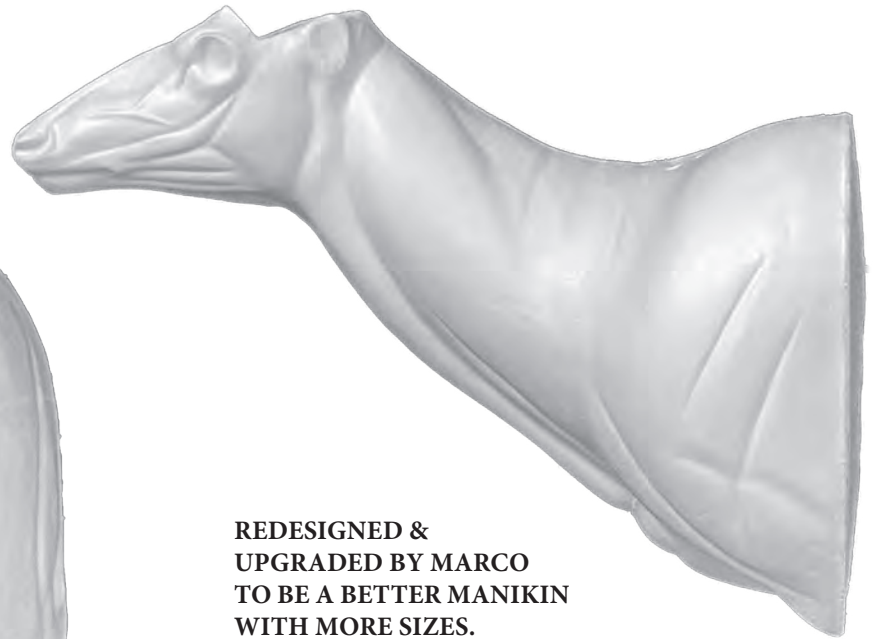

REDESIGNED &  
UPGRADED BY MARCO  
TO BE A BETTER MANIKIN  
WITH MORE SIZES.

MOUNTED BY  
DEREK SHAW,  
SHAW TAXIDERMISTRY

In sculpting the muledeer and whitetail forms my goal was to pay attention to and capture the correct anatomy of our Canadian deer. Structural detail in facial anatomy was important between the two species and much of my focus was given to the neck musculature all the way down to the deep brisket and leg detail. Shoulder anatomy was refined and combined with the other structural changes this new line of forms is sure to create a great fit.

A handwritten signature in black ink that reads "MPilon". The signature is stylized and cursive.

**Antler and Horn conditioner contains no wax, pigment or dye and is not just a resurfacing agent. Paste penetrates through outer surface, truly conditioning antlers and horns. Unique properties clean, condition and enhance visual colour while leaving a natural feel to the surface. Enriches, but will not discolour horns on goat, sheep, cattle, kob, lechwe, waterbuck and others**

## How to Paint Flehmen Mouthpiece Assembly by Joe Meder

### Steps

1. Wash all parts with thinner to clean any molding residue or dirt (Photo 1)
2. Spray the entire palette, lower jaw, and tongue with flesh tone. Feather out the flesh tone towards the front of the palette. (Photo 2)
3. Spray black at a low or flat angle to achieve the desired gray detail of the papillae and palette. (Photo 3)
4. Lightly spray a thin wash of gill red on the palette and lower jaw to brighten.
5. Same steps can be used for the tongue, except a deeper color of red is necessary. Check your references for palette and tongue colors.
6. The septum should be sprayed with flesh only.
7. Using Burnt umber oil paint, coat the teeth with paint and wipe off until the desired staining effect is achieved.
8. Coat all parts with clear gloss and assemble. (Photo 4)

Paints:  
Airbrush: Flesh tone, Black, Gill Red  
Oil: Burnt Umber

# McKenzie's Joe Meder Deer Eye

## with Liquid Lens™ Technology

We are excited to introduce a design in deer eyes by Joe Meder with a revolutionary patented breakthrough effect called Liquid Lens™ Technology. To create this eye Joe went back to the basics and began by casting eyes and lenses from fresh deer. He then took those casts to his pen of live deer to compare. Once the prototype was complete, it was time to begin testing colors. Roger Martin from McKenzie and Teresa Fonder from Van Dyke's were brought in to help develop the special effect Joe was looking for. Glass eyes have always had a certain "flat" or lack of 3D effect when it comes to the depth that can be achieved with painting. Joe was very specific in that he wanted to create the effect of how a live eye captures and reflects light. With this request Roger has invented what may prove to be one of the biggest advances in glass eye technology in years. Through a series of mold designs and painting techniques he and Teresa have achieved for the first time in taxidermy, a truly "liquid" look in the lens.

Note: The Meder eyes now have a notch in the base to indicate the front of the eye.

Front View

The brown in the limbus band has been extended in the front to allow for easy setting in any deer form.

Back View

This lens shape by Joe Meder is cast from a real deer and allows the eye lid to lay accurately on the glass.

# Rotated Meder Eyes

## with Liquid Lens™ Technology

For years, we've used paint schemes on our pre-rotated eyes to mimic natural eye patterns and direction. Showing white in the front or back corner of the eyes can help an artist capture a moment in time, and tell a better story. Our Rotated Meder Eyes are the first in the industry with designated right and left eyes, to help create a more natural setting. The lenses are designed so that the corneal bulge is anatomically accurate for a rotated eye set. Whether looking at a butterfly, or rubbing a tree branch, every small detail counts! It can make all the difference in competition.

- ▶ Two Separate Lenses for Right and Left Eye.
- ▶ Only True Pre-Rotated Eyes on the market!
- ▶ Forward-Looking Liquid Lens Technology.
- ▶ Meder Eye Artwork Everyone Loves!
